

REACH Declaration

Lecenté (Nail Perfection Ltd) Cosmetic Glitters are defined as a finished article and therefore do not require registration under REACH.

Article 3(3) of Reach regulations states - "article: means an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition". Glitter clearly has a definite shape, surface and design given during the manufacturing processes which determine its end use rather than its chemical composition.

We can confirm that Lecenté (Nail Perfection Ltd) Cosmetic Glitters do not contain any SVHC's (Substances of Very High Concern) as defined under REACH regulations.
